

## Counter Collection

### Box Counter

Box cultured marble counter is made with a thick profile, and is suitable for mounting onto a cabinet, or as a stand-alone, staggered counter piece.

## Description

The modern and contemporary Box Counter can be made to fit, with option to customise the length, width and height.

Add-ons such as upstand, splashback and towel cut-outs can be included to your bespoke counter unit.

Suitable heavy-weight brackets are provided. Gel coat colours come in a satin and gloss finish.

## External Counter Dimensions

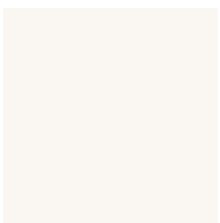

Length 600 - 2000

Width 300-600

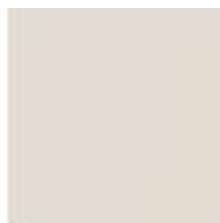

Fascia 20-120

Upstand 16-200

## Gel-coat Colours

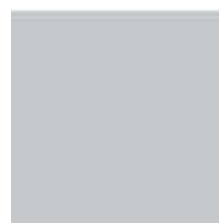

Cotton White

Sand

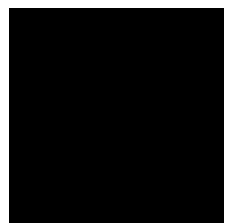

Taupe

Concrete Grey

Charcoal

Midnight Black

## Material & Care Tips

Marblecast counters are made from a mixture of crushed marble and resin - 80% marble and 20% resin.

The material is mixed together and a small amount of catalyst is added.

The catalyst reacts with the resin and ensures that the resin polymerizes and hardens into a hard, strong mass.

This mass is then moulded into highly durable bathroom ware.

Marble material is sealed with gel coat, providing a polished or satin surface finish in a variety of colours.

Clean with a soft cloth or sponge using soap or mild detergent and warm water.

The use of abrasive pads or chemical abrasives will dull the product over time.

Stains can be removed by hand with a white polishing compound.
